### Hitachi Zosen Corporation will sponsor the Future Society Showcase Projects “Future Life Expo: Future City” ~ Japan Association for the 2025 World Exposition: Designing Future Society for Our Lives~

Hitachi Zosen Corporation (hereinafter referred to as Hitachi Zosen) will sponsor the Future Society Showcase Projects “Future Life Expo: Future City”, at Japan Association for the 2025 World Exposition (Expo 2025 Osaka, Kansai, Japan).

#### ◆Exhibition concept◆ *In the world tree*

Hitachi Zosen aims for a "happy future" for people and the Earth. This means that the happiness of people will become the happiness of the Earth, and the energy of people will become the energy of the Earth. We will create this happy future through Hitachi Zosen's technology, and have set the "World Tree" as the base of the connection between people and the Earth.

\*The actual booth design and specifications may differ from the images above due to planning and production in progress.

The Future Society Showcase Projects are a group of six projects that provide visitors with future-inspired experiences at the Osaka-Kansai Expo. The “Future Life EXPO - Future City” is one of those projects, with themes such as cities and the environment, and will be a stage for bringing to highlight the image of the city of the future that the Japanese government is aiming for in the Society 5.0 initiative: a human-centered city that combines economic development with solutions to social issues.

Hitachi Zosen plans an exhibition where visitors can experience a range of innovations in the fields of Environment and Energy, and get a real sense of the future. Through an exhibition that combines the cyber field (virtual space) and the physical field (real space), visitors will be invited to reflect on different thoughts and ideas, and to think together about the vision of the city of the future.
